

EDGARSSON SECURITY DESIGNS

JITTERBUG

Simply attach Jitterbug to the asset that you wish to monitor and arm the device. Jitterbug will notify you by SMS Text Message if your asset is being tampered with. Then you can phone it and use the microphone to listen to what is happening.

Description

- Small, rugged, water resistant case (IP65) measuring just 120 x 85 x 57 mm and weighs only 150g.
- Internal tilt and tremble sensors. The sensitivity of the tremble sensor can be manually configured.
- Microphone, which can be used for listen-in.
- Powered by a Lithium-Ion battery or 12V DC Power Input.
- **1 year operation** between battery charges in low power mode.
- Uses the GSM mobile network and includes a internal GSM antenna.
- LED indicates the status and operation of the unit.
- Touch button fob for manual arm/disarm.
- Low battery and external power lost detection.
- Ultra-Low quiescent current draw.

* Please note SIM card not provided.
